

a Source-aware clips

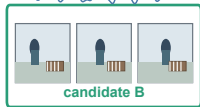

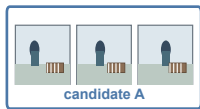

provenance

- dataset + raw source
- segment index + time
- source-disjoint group

long videos yield grouped windows

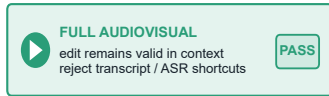

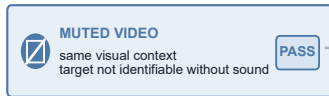

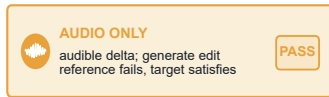

b Audio-first pairing

high visual context similarity

clear speech / music / event delta

c Modality-isolated verification

A pass at one gate cannot compensate for a failure at another.

d Audit and freeze

atomic review ledger

- decision + confidence
- rejection + reviewer
- media + provenance

canonical deduplication

sample / pair
source / inverse

FROZEN FULL1000

1,000 targets +
1,000 references
